

## Pest Control Tips & Hints Before We Arrive

While we look forward in treating your home from pests, we will need your assistance to make the areas to be treated are as accessible as possible.

1. Please make sure we have a parking space as close to your home as possible.
2. Try and allow access to all skirting boards and pull out all furnishings that are up against the walls.
3. Please clean the dust of all areas to be treated such as skirting boards, wooden floors, tiled floors and vinyl floors before we arrive.
4. Remove all items from the floor such as clothes, towels, toys, pot plants, and bins etc that are close to the skirting boards. Curtains or drapes can be hung up on the end of the rod or draped over each other.
5. There is no need to empty cupboards as we use a gel base product in all the wet areas of your home such as kitchens, bathrooms and laundry. The skirting boards in these areas are sprayed.
6. If you have pets please make sure they have a safe place to go during the pest control treatment.
8. All though the pest spray we use is safe for humans and pets we recommend removal of pet foods and water bowls. These can be returned after the areas have been treated.
9. Please cover all fish tanks and turn off filters. We also advise to remove any reptiles to a safe place that is NOT going to be treated. If this is not possible place a towel or sheet over the area your retile lives.
10. If we a treating outside do not hose down afterwards, use newspaper to clean your windows if required. Do not remove cob webs this should be done 10 days after the pest control treatment.
11. Please remove all clothing of your clothes line outside and have your wheelie bins accessible for us to treat.
12. Please show our pest control technician any concerns you may have or any pests that you have seen running around.

If you have any questions or concerns, feel free to call us on 3823 2333 or visit [ww.safeclean.com.au](http://ww.safeclean.com.au)
